Go2Group “YOUR TESTING PARTNER”

Decrease testing costs up to 50% by:

- Shortening the overall development cycle.
- Decreasing fixed labor costs by supplementing your team with a global component.

Increase software quality by:

- Optimizing early bug identification using Go2Group ONE™ proprietary testing methodology.
- Increasing test coverage in a systematic way for predictable results.
- Focusing on development and creativity while off-loading the QA to testing specialists.

Expand market opportunities by:

- Increasing platform support.
- Expanding internationalization coverage.

WHY Go2Group?

As your global team component, Go2Group enables you to compress total product development time and ensure a higher quality product.

Dedicated, Custom-Built Teams

Blend your domestic domain expertise with our world-class testing capabilities to meet your unique needs for long-term, sustainable results.

Project Management

- Our industry specific project management methodologies and tools enable you to access project information 24/7.
- Our risk management methodologies and security practices protect your IP.

- Our customer response time sets the industry standard and our culture is one of mutual accountability, trust and commitment.

QuickRelease™

Our streamlined testing and management process designed to make it easy for new customers with no hassles and fast start up.

Western Management

Experienced management with extensive IT outsourcing experience that understands global business issues and ensures that your priorities and concerns are understood and addressed.

Go2Group SOLUTIONS DELIVER RESULTS

Increase quality systematically with shorter test cycles and broader test coverage:

One Stop Testing Services

- Test planning, management and execution.
- Platform verification, compatibility testing and regression testing on multiple operating systems, databases, application servers, languages, and client browsers.
- Globalization, localization, security, usability, performance and functional testing.
- Accurate bug reporting and tracking with 24x7 secure access.
- Automated testing with leading industry tools.
- Customized test tool development.
- Independent third party acceptance testing.

On Demand Testing Solutions

- Access deep technical expertise in performance and automated testing to find bottlenecks before your customers do and increase regression test coverage.
- Complement your local team with a dedicated global component.
- Balance your development team with an independent testing department.

Go2Group ONE™ TEST AUTOMATION

Today **automated software testing** plays a vital role in many IT projects. At Go2Group, we specifically developed our test automation methodologies to deliver cost-effective automated testing for small companies. Go2Group automated testing provides:

- Predictable, repeatable, and quantifiable results
- Minimum manual intervention, reducing human error
- Fully automated and scalable systems to ensure reliable and valid processes on multiple platforms
 - Operating systems
 - Databases
 - Application servers
 - Localized languages

CUSTOMER TESTIMONIALS

By first investing time and effort in understanding your processes and needs, our experience demonstrates that we know how to build mutual trust and collaborate successfully as our clients will attest:

“Our products are very complex. We expected a one year ramp up time, but Go2Group was able to contribute to our release cycles in just 6 months. This includes test automation, functional, and localization testing.”

- Development Vice President, Hyperion-Oracle

“These are the best bugs we’ve ever seen!”

- Product Manager, move networks

“The results are very encouraging – thanks a lot for all the effort put into this project. We really appreciate your work.”

- Manager, Quality Assurance, Autodesk

“We are quite pleased with the quality of the cases, well done.”

- QA Lead, Nimsoft

Take Go2Group’s **FREE ASSESSMENT Challenge!**

Contact us at sales@go2group.com for a no hassle, **FREE** software test assessment and learn how you can improve your software quality today.
