

Go2Group

Your Productivity Force Multiplier

Go2Group Capabilities Statement

Simplifying Your Connection to Colleagues and
Enterprise Resources

Go2Group
Services

“ Go2Group was able to provide the needed expertise and resources to successfully complete our complex migration. Our hats go off to the Go2Group team. ”

Jason Oliver
Director of Standards Development, MCCI

Assessment

It all starts with the assessment. A clearly defined roadmap describing where you are today and where you would like to be tomorrow.

Training

Your team needs in-depth administrator and user training courses. Whether you're an administrator, user, or developer, we'll get you up and running quickly.

Migration

Migrating your team from a legacy system to a highly-efficient solution is critical. Our industry-tested migration tools make this process effortless.

Deployment

You benefit from our experience, getting set up the right way the first time. Whether onsite or remote, we have provided successful deployment engagements to clients around the world.

Integration

Go2Group has authored many different integration tools to assist clients in extending their systems to a wider audience.

Development

From custom plugins to integrations and corporate branding, Go2Group has your custom development needs covered.

AccuRev. Atlassian. Perforce. Replay
Solutions. Salesforce. SugarCRM

Go2Group
Products

“ We were looking at different resources that would allow our QA team to collaborate directly with our development team, and Go2Group’s integration was the tool of choice. ”

David Sowerbutts
Integration Services Architect, Healthways

JaM

Increase collaboration between your development and test teams, resulting in a faster release process. The Go2Group JaM Plugin ties Quality Center artifacts with JIRA issues.

CRM

Support and sales teams work hand-in-hand, even when working in different environments. The Go2Group CRM Plugin returns the focus to your clients, integrating JIRA with Salesforce or SugarCRM.

synapseRT

Provide your team with requirements, test, and traceability management - All within JIRA. Go2Group synapseRT allows your development and test teams to work as one.

Perforce

Create a Perforce job directly from a JIRA issue, allowing your entire team to see which assets are linked to development issues.

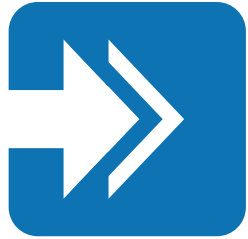

DOORS

The bi-directional nature of the Go2Group DOORS Plugin for JIRA allows new DOORS requirements to be associated with JIRA projects. Automatically.

Labs

Go2Group Labs is stocked full of free products that are useful in many environments. Support is available for all products, including those found in the Go2Group Labs.
